Application/Control Number: 10/060,203

Art Unit: 1774

#### **DETAILED ACTION**

### Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - Claims 1-6, drawn to an organic electroluminescent material, classified in class
     428, subclass 690.
  - II. Claim 7, drawn to a process for preparing an organic electroluminescent material, classified in class 564, subclass 497.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, a tertiary aryl amine can be processed by reduction.
- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 4. During a telephone conversation with Craig McRobbie on June 23, 2003, a provisional election was made with traverse to prosecute the invention of Group I, claims 1-6. Affirmation of this election must be made by applicant in replying to this Office action. Claim 7 is withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Application/Control Number: 10/060,203

Art Unit: 1774

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

#### Priority

6. Applicant cannot rely upon the foreign priority papers to overcome this rejection because a translation of said papers has not been made of record in accordance with 37 CFR 1.55. See MPEP § 201.15.

## Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in-

- (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or
- (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Application/Control Number: 10/060,203

Art Unit: 1774

8. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Shi et al., U.S. Patent Number 5,593,788.

Shi discloses an organic electroluminescent device wherein the hole-transporting layer contains at least one aromatic tertiary amine. Additionally, the reference discloses that in one form the tertiary amine can be and arylamine as per instant claim 1 (see column 6, lines 31-43). Also, in column 6 of the reference, other forms of the tertiary amine can include diarylamine and triarylamine as per instant claim 2. Formula V of the reference discloses that Q<sup>1</sup> and Q<sup>2</sup> are independently aromatic tertiary amine moieties and G is a linking group such as an arylene as per instant claim 3. Column 16, lines 8-10 disclose that the hole transporting layer can comprise N,N'-Bis-(1-Napthyl)-N,N'diphenylbenzidine as per instant claims 4 and 5. Claim 1 is a product-by-process claim. Even though product-by-process claims are limited and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claims is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior art was made by a different process. See MPEP 2113.

9. Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Nii, U.S. Patent Number 6,555,959.

Nii discloses a material for a light-emitting device, which is represented by the following formula

Art Unit: 1774

wherein R<sup>2</sup> and R<sup>3</sup> are the same or different and each represents an aryl group and Ar<sup>1</sup> are the same or different and each represents a divalent aryl group as per instant claim 1 (see abstract). Additionally, formula D-48 reads on the tertiary aryl amine in claim 2. Example 5 of the reference discloses that N,N'-bis(1-napthyl)-N,N'-diphenylbenzidine is present in the device as per instant claims 3 and 4. Claim 1 is a product-by-process claim. Even though product-by-process claims are limited and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claims is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior art was made by a different process. See MPEP 2113.

10. Claim 6 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communication from the examiner should be directed to Camie S. Thompson whose telephone number is (703) 305-4488. The examiner can normally be reached on Monday through Friday from 7:30 am to 4:00 pm. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cynthia H. Kelly, can be reached at (703) 308-0449. The fax phone numbers for the Group are (703) 872-9310 {before finals} and (703) 872-9311 {after finals}.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0661.
